EXPERIENCE

LOQOL / Sunday.Pro Inc. | Lead Software Engineer Oct 2026 – Present

Sole engineer | Part-time, 20 hrs/week, remote | Previously Software Engineer, Aug–Sep 2026

- Cut document retrieval from ~15s to ~5s (~67%) through caching and signed URL reuse.
- Own architecture, implementation, testing, and production releases for an AI real-estate transaction platform using React, TypeScript, FastAPI, PostgreSQL, and Google Cloud Run.
- Preserved seller edits across an 82-question disclosure interview; mapped 133 Transfer Disclosure Statement fields and integrated DocuSeal multi-party signing and PDF prefill.
- Build Charlie AI to guide sellers through documents using property and deal context; integrate comparative market analysis grounded in comparable sales.
- Delivered guided property preparation with vendor requests, audio walkthroughs, and repair scopes; validate transaction workflows through automated tests and live release checks.

GOSVEA | Software Engineer Jul 2026 – Oct 2026

Software Engineer Intern, Jun 2026 | Part-time; concluded early Oct 2026

- Developed USJOPU, an AI learning platform connecting business problems to skill paths, project tasks, and AI or mentor feedback.
- Built the ALLCPR iOS app end to end through TestFlight delivery; launched FirstCPR.com course-discovery and enrollment flows with mobile UX and SEO improvements.
- Built location-intelligence tools using 9 external data APIs, ZIP-level scoring, maps, and historical validation; developed operations assistants and hybrid-retrieval research tools.

Curio | Founder and Software Engineer Jun 2026 – Present

Independent product | Sole developer

- Independently built and released an AI reading app on iOS and Android, from React/TypeScript and Capacitor clients to Express/PostgreSQL services and store submissions.
- Reached 367 first-time iOS downloads and 101 new Android acquisitions by Oct 2026; shipped offline reading, translation, explanations, and quizzes.
- Built content-generation and publishing pipelines that check sources, factual risk, similarity, and quality before release; use performance feedback to guide iteration.

EARLIER EXPERIENCE

Scenara | Founder | Oct 2025–Apr 2026 Built a FastAPI/PostgreSQL prediction-market simulator with portfolios, probability pricing, PnL, and automated resolution.

GTSP Group | Robotics Engineer Intern | May 2025–Apr 2026 Supported sensor calibration, actuator tuning, embedded-controller integration, and robotic system validation.

SELECTED PROJECTS

ATLAS, Mingtu, and Continuity Built walk-forward ML research across 28 FX pairs and hybrid BM25/semantic research tools; developing persistent project context for AI workflows.

TECHNICAL SKILLS

Languages and frontend: TypeScript, JavaScript, Python, SQL, C++, React, TanStack Query, Capacitor
Backend and AI: FastAPI, Express, PostgreSQL, SQLAlchemy, Alembic, OpenAI API, LLMs, RAG
Cloud and delivery: Google Cloud Run, Docker, Git, GitHub Actions, CI/CD, Supabase, Vercel, DocuSeal

EDUCATION

California State University, East Bay | B.S. Computer Engineering | Expected Aug 2027
Green River College | A.S. Computer Engineering | 2022–2024
Founder and President, Coding Club | Phi Theta Kappa | English, Chinese, Portuguese, Spanish
